Skills

Languages: Python, JavaScript, SQL, HTML, CSS

Framework & Library: Django, React, TailwindCSS, Bootstrap

Miscellaneous Technology: Git/GitHub, Linux Shell

Experience

Front End Developer Intern | Salesqueen Software Solutions Feb 2023 - Mar 2023

- Resolved a critical bug in an HR management dashboard, correcting issues with inaccurate graph rendering using ReactJS.
- Developed and implemented sub-tabs for employee login/logout records and upcoming leave dates with HTML and Bootstrap.
- Enhanced dashboard functionality by integrating additional features for improved HR management, leveraging ReactJS and Bootstrap for a responsive design.

Projects

BlogCraft | JavaScript, ReactJS, Python, Django, SQLite, Git

- User Roles & Permissions:** Implemented a flexible system with distinct user roles and permissions for enhanced content management.
- Markdown Support:** Integrated Markdown support for enriched post formatting and customization.
- Data Export:** Enabled export of posts and comments to CSV and PDF formats for easy data management.

NoteMaster: Document Management System | JavaScript, React.js, TailwindCSS, Git, Python, Django, SQLite

- User Authentication and Authorization:** Implemented secure user login, registration, and session management.
- Search Functionality:** Implemented search features for easy retrieval of documents and notes.
- Rich Text Editor:** Integrated a rich text editor using Slate.js for creating and editing documents with various formatting options.
- Responsive Design:** Ensured the application is mobile-friendly with a responsive design using CSS and React.
